LIST OF CONTENTS FOR VOLUME 20, 1993

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1993 Volume 20, Number 1 January-February

Contents

K.J. Renken, M. Aboye, M. Carneiro, and K. Meechan	1	Effect of vapor velocity on film condensation along a surface embedded in a porous medium
M.M. Rahman and A. Faghri	15	Transport in a thin liquid film on the outer surface of a wedge or cone embedded in a porous medium. Part I: Mathematical analysis
M.M. Rahman and A. Faghri	29	Transport in a thin liquid film on the outer surface of a wedge or cone embedded in a porous medium. Part II: Computation and comparison of results
K. Muralidhar and Mathew Verghese	43	Analysis of adsorption and desorption processes in a porous medium
R.K. Wanchoo	53	Evaporation of drops in direct contact with an immiscible liquid: bubble growth
G.S.H. Lock	63	On the flooding limit in the evaporative, tubular thermosyphon
M. Goel, S. Sengupta and S.K. Roy	69	The performance of liquid heat sinks with phase change material suspensions
T.N. Tulasidas, T. Kudra, G.S.V. Raghavan and A.S. Mujumdar	79	Effect of bed height on simultaneous heat and mass transfer in a two-dimensional spouted bed dryer
R. Karabacak	89	Some propositions for higher coefficient of performance on a conventional refrigeration plant
H.A. Destefanis, E. Erdmann, D.A. Tarzia and L.T. Villa	103	A free boundary model applied to the estimation of the diffusion coefficient in a gas-solid system
L.C.C. Gonçalves and J.A. Kolodziej	111	Determination of effective thermal conductivity in fibrous composites with imperfect thermal contact between constituents
C.V. Madhusudana	123	Thermal contact conductance and rectification at low joint pressures
I. Mutlu and T.T. Al-Shemmeri	133	Steady-state and transient performance of a shrouded longitudinal fin array
S.L. Chen, H.K. Ma and D.Y. Chen	145	Radiation blockage by the interaction of thermal radiation with conduction and convection in the combustion of condensed fuels
Announcement	159	10th International Heat Transfer Conference

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1993 Volume 20, Number 2 March-April

Contents

X. Tang and P. Cheng	161	Correlations of the cycle-averaged Nusselt number in a periodically reversing pipe flow
R. Raghunath	173	Determining entrance conditions from downstream measurements
M.-H. Chun and J.-W. Park	185	A simplified two-step thermal analysis method for Wolsung (CANDU) spent fuel dry storage canister
S.X. Gao and J.P. Hartnett	197	Steady flow of non-Newtonian fluids through rectangular ducts
C.S. Yueh, C.I. Weng and C.C. Hwang	211	The heat transfer effects of tube wall on a parallel-loop thermosyphon
S.H. Choi, S. Shin and Y.I. Cho	221	The effect of area ratio on the flow distribution in liquid cooling module manifolds for electronic packaging
B.A. Rock and F. Yu	235	Influence of plate absorber gaps on the interception of direct beam radiation
E.A. Trautenberg and R. Röckelein	245	On the finite element simulation of fluid motion with high Reynolds or Grashof number
H.S. Takhar, S. Nitu and I. Pop	255	Variable viscosity effects on natural convection in axisymmetric stagnation flows adjacent to vertical surfaces
I. Kotcioglu, A.Y. Uyarel, K. Kaygusuz, S. Gullapoglu and I. Dincer	265	An approach to heat and mass transfer analysis during film condensation inside a vertical tube
D. Angirasa and R.L. Mahajan	279	Combined heat and mass transfer by natural convection over a horizontal surface
B. Su and M.S. El-Genk	295	Forced convection of water in rod-bundles
I Dincer, C. Varlik and H. Gun	301	Heat transfer rate variations in a canned food during sterilization

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1993 Volume 20, Number 3 May-June

Contents

R.J. Feller and C. Beckermann	311	Modeling of the globulitic solidification of a binary metal alloy
Y.-X. Tao and D.M. Gray	323	Validation of local thermal equilibrium in unsaturated porous media with simultaneous flow and freezing
H.S. Kou and K.T. Lu	333	Combined boundary and inertia effects for fully developed mixed convection in a vertical channel embedded in porous media
F.C. Lai	347	Natural convection in a horizontal porous annulus with mixed type of radial baffles
E. Hahne and K. Shi	361	How to obtain pool boiling heat transfer coefficients for tubes from wire experiments
W.J. Miller and B. Gebhart	375	Boiling on microconfigured surfaces in liquid nitrogen
X.C. Huang, P. Weber and G. Bartsch	383	Comparison of transient and steady-state boiling curves for forced upflow of water in a circular tube at medium pressure
J.B. Yapo and S.K. Aggarwal	393	Comparison of FCT with other numerical schemes for the Burgers equation
R.N. Hills and P.H. Roberts	407	A note on the kinetic conditions at a supercooled interface
K. Vajravelu and A. Hadjinicolaou	417	Heat transfer in a viscous fluid over a stretching sheet with viscous dissipation and internal heat generation
T.-Y. Wang	431	Mixed convection heat transfer from a horizontal plate to non-Newtonian fluids
I. Dincer	445	Heat transfer rates during immersion cooling of spherical and cylindrical products
Announcement	457	10th International Heat Transfer Conference

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1993 Volume 20, Number 4 July-August

Contents

D.N. Assanis and F.A. Friedmann	459	A thin-film thermocouple for transient heat transfer measurements in ceramic-coated combustion chambers
B. Doytcheva, P. Carreau and J. Paris	469	Experimental investigation of the mass transfer from a microsphere to a fluid in a fixed bed
C.-H. Lee and K.-W. Lin	477	Experimental investigation of flow transient critical heat flux at light water reactor conditions
K.-T. Lu and H.-S. Kou	489	The effective thermal conductivity of porous material with spherical inclusions in a tetragonal or simple cubic array
J.L. Lage	501	Natural convection within a porous medium cavity: predicting tools for flow regime and heat transfer
M. Kostic	515	Influence of viscosity function simplification on non-Newtonian velocity and shear-rate profiles in rectangular ducts
S.P. Ketkar	527	Iterative and direct solution methods in thermal network solvers
J.A. Carvalho, Jr. and P.R. Gotaç	535	Heat and mass balance analysis of an incinerator for aqueous wastes
B.S. Yilbaş	545	Analytical solution for the heat conduction mechanism appropriate to the laser heating process
P. Sangsurasak, D.A. Mitchell and M. Hossain	557	Transient two dimensional heat conduction by orthogonal collocation technique
B.A. Jubran, M.A. Hamdan, B. Tashtoush and A.R. Mansour	567	An approximate analytical solution for the prediction of transient response of the Trombe wall
B. Ozerdem and M. Toksoy	579	An experimental study of convective heat transfer in a partially filled and horizontally rotating cylinder
J.-H. Tsai	585	Inverse scattering problem with two flux methods
E. Cafaro and C. Cima	597	Non-linear analysis of the two-dimensional Rayleigh-Taylor instability
Announcement	605	10th International Heat Transfer Conference

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1993 Volume 20, Number 5 September-October

Contents

S.H. Choi, S. Shin and Y.I. Cho	607	The effects of the Reynolds number and width ratio on the flow distribution in manifolds of liquid cooling modules for electronic packaging
D.J. Cha and S.S. Cha	619	Three-dimensional natural convection flow around an isothermal cube
P.G. Vázquez, C.V. Cáceres, M.N. Blanco and H.J. Thomas	631	Influence of support on concentration profiles in alumina pellets impregnated with molybdenum solutions
D.S. Chau, B.D. Wood, N.S. Berman K.J. Kim	643	Solubility of oxygen in aqueous lithium bromide using and electrochemical technique
J.L. Xia, B.L. Smith and G. Yadigaroglu	653	A simplified model for depressurization of gas-filled pressure vessels
B. Siwoń	665	Experimental investigations of the liquid film by a gas-liquid spray jet impinging onto a flat surface
S.-Y. Sun, Y.-D. Lu and C.-Q. Yan	675	Optimization in calculation of shell-tube heat exchanger
J. Rymkiewicz and Z. Zapałowicz	687	Analysis of the evaporation process for water droplet on flat heated surface
K.C. Leong and G.Q. Lu	699	Heat transfer in fluidized bed coating of copper cylinders
Y.A. Kilic, N. Kahveci, I. Dincer and T. Bardakci	711	An experimental and theoretical investigation of transient heat transfer between a spherical coal particle and air medium during devolatilization
S.C.M. Yu, J.H. Yeo and J.K.L. Teh	721	Some measurements downstream of a lobed forced mixer with different trailing edge configurations
H.E.S. Fath and M. Khodheer	729	Natural convection heat transfer in horizontal annulus with an open trough (Black Body Solar Energy Receiver)
H.-S. Kou and K.-T. Lu	737	The analytical solution of mixed convection in a vertical channel embedded in porous media with asymmetric wall heat fluxes
S.X. Gao and J.P. Hartnett	751	Analytical Nusselt number predictions for slug flow in rectangular duct

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1993 Volume 20, Number 6 November-December

Contents

T.W. Tong, M.C. Sharatchandra and Z. Gdoura	761	Using porous inserts to enhance heat transfer in laminar fully-developed flows
N. Khatri, M. Brown and F. Gerner	771	Using fiber optics to tap the sun's power
N. Savkin, Z. Mesarkishvili and G. Bartsch	783	An experimental study of void fraction and heat transfer under upward and downward flow boiling conditions
A.D. Solomon, V. Alexiades and G.K. Jacobs	793	Heat transfer analysis of a field-scale melting experiment
N.S. Goel, S.P. Rana and D.V. Sreenath	803	Heat conduction in heterogeneous materials and irregular boundaries II: A simple and fast algorithm for massively parallel computer
A.R. Mansour, S. Taqieddin and Y.A. Jawad	811	An analytical analysis for the prediction of nonlinear inverse temperature profiles in solid explosives
T. Elperin and A. Fominykh	821	Heat and mass transfer during gas hydrate formation at the surface of rising slugs with small admixtures of inert gases
S. Shin and Y.I. Cho	831	Temperature effect on the non-Newtonian viscosity of an aqueous polyacrylamide solution
T.-Y. Wang	845	Mixed convection heat transfer from a horizontal plate to non-Newtonian fluids
R.Z. Qian and S.C. Saxena	859	Heat transfer from an immersed surface in a magneto-fluidized bed
T. Watanabe and I. Pop	871	Magnetohydrodynamic free convection flow over a wedge in the presence of a transverse magnetic field
D.M. Brown, W. Li and S. Kakaç	883	Numerical and experimental analysis of unsteady heat transfer with periodic variation of inlet temperature in circular ducts
P. Lasgorceix, V. Lago and M. Dudeck	901	Fluxmetrie dans un jet rarefie de plasma d'air
	909	LIST OF CONTENTS FOR VOLUME 20, 1993
